

MANAGING RISKS WITH BOLLORÉ LOGISTICS

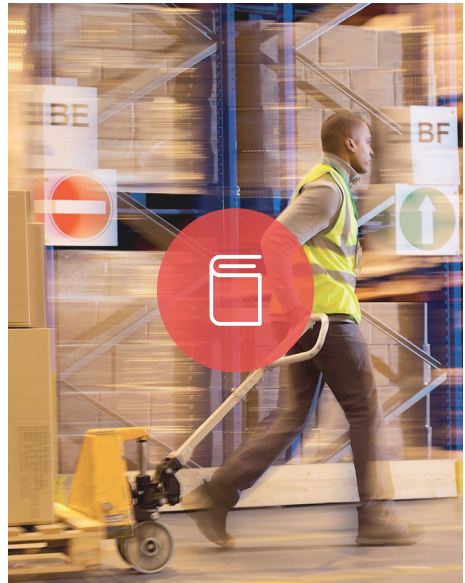

Bolloré Logistics is harmonising Health, Safety and Environment management. A global HSE management system for warehouses, sites and yards to best meet your requirements and guarantee optimal performance for your businesses.

The aim is to ensure that we prevent and mitigate risk in our transport and logistics operations, and apply standardised operating procedures across our network.

A reference manual, a unique operational tool that brings together all the Company's knowledge and expertise and capitalises on best practices:

- ▶ Identifying and assessing risks, reducing their impact
- ▶ Conducting audits and inspections
- ▶ Analysing events and providing feedback
- ▶ Managing corrective and preventive actions
- ▶ Monitoring HSE performance across all of the sites we operate for you

The manual also provides a range of tools to constantly improve HSE culture and helps to develop safe and sustainable practices, which are a key factor in achieving optimal HSE performance.
